To whom it may concern

The Municipal Non-Commercial Enterprise of the Izmail City Council of the Izmail District of the Odessa Region, "Izmail City Central Hospital", expresses its respect and addresses you with the following request.

Our medical institution is a hospital that provides emergency and planned medical care to the resident of Izmail and the Izmail district. The hospital includes 9 inpatient departments with 300 beds and 14 specialized outpatient departments. We provide emergency and planned surgical, trauma, therapeutic (neurology department with an intensive care unit), rehabilitation, palliative, pediatric and obstetric medical care round the clock to all who need it. At the beginning of the full-scale invasion of the aggressor country, a large number of people from combat zones moved to our region, significantly increasing the number of patients in our medical institution. This has led to an increased demand for medical equipment, medicines and medical supplies.

To improve the efficiency of medical care, we kindly ask for your support in acquiring:

- 1. Vacuum wound therapy device Confort C300 NPWT** – a vacuum pump for wound therapy, the essence of which is to apply negative pressure to the affected area, removing bacteria and excess tissue fluid from wounds, which causes swelling and hinders blood circulation.

Intended for: For patients with chronic, acute, traumatic, purulent and open wounds, burns, ulcers, (diabetic and pressure sores).

Indications:

- Orthopedic trauma.
- Soft tissue injuries.
- Skin defects.
- Bedsores.
- Leg ulcers.
- Diabetic foot.
- Burns.
- Open abdominal wounds.
- Treatment of surgical infections and other surgical wounds.

2. Surgical iodine laser "LIKA - surgeon"

Designed for performing a wide range of surgical manipulations, including:

- Vaporization (selective removal) of biological tissues.
- Correction of the shape and volume of healthy tissues for aesthetic and therapeutic purposes.
- Ensuring hemostasis.
- Biotissue coagulation.
- Infrared thermotherapy.

With respect to you and your activities
General Director

Serhiy Bazhak
